

Starting with my description, I was in Intermediate Cycle with Ruben Romero, who continues here, but the others, namely Nieto, Pablo, and Rafita, left. My name is Rodrigo, I'm 19, and my goals this year are to get the best grades but mainly to learn as much as possible. My birthday was yesterday (the 19th). I love sports: I have practised water polo, football, and padel. Despite studying, I still have some aspirations. For example, I would like to learn how to invest, and I would also like to learn how to make AI automatizations with n8n. In conclusion, I'm enthusiastic and friendly.
